

Four Keys to Success for Getting Whatever You Want

The “keys to success” have been contemplated, pondered, and investigated for hundreds of years. Everybody is looking for “the keys to success”; simply because it is an inner motivation with the human psyche. Everybody has a desire to be successful in some form or other.

The movie, “The Secret,” became an overnight success when it was featured on Oprah, CNN, and other television shows. It is on the Law of Attraction and the vibrational energy we are always creating. In the home business industry we have always known about the Law of Attraction; simply, because the industry is all about personal development to assist us in becoming successful in our relationships, finances, health, business, and our spiritual lives. I've discovered that there are four simple “keys to success” at the heart of the creation process in getting whatever you want by doing the following four steps to achieve any goal you have.

1. STEP ONE: KNOW WHAT YOU WANT

The first “key to success is knowing what you want. Yet, this most basic first step is missed by the majority of people. But, you really must know what you want in order to get what you want as specifically as possible. Daydreaming about your future will not bring you what you want. The only way to get what you want is to decide with clarity and focus exactly what you want to create.

So how do you know what you want? First of all, you must know what you DON'T want. So, first of all write down what you don't want--just to be clear with yourself. Then, write down what you want starting with your desires, your dreams, and everything that you do want for your life. Then pick the one thing on your list that you know you could accomplish if you dedicated some energy to it and forget about the rest. Then, focus, focus, and focus.

Don't waste your energy wishing and dreaming for a million and one things; ---just pick one. Just as the journey of a thousand miles begins with a single step, the journey to your ideal life also begins with a single goal. Begin with an easy, do-able goal that you have not unaccomplished. Write them down as specifically and exactly what it is you will create. After you accomplish the first goal then, you can move on to the next goal.

2. STEP TWO: FOCUS ON WHAT YOU WANT

The second “key to success” is that you must give positive focused thought, energy, and attention to your goal. You must imprint it on your conscious and subconscious mind until it becomes reality. Remember, thought is blindingly fast compared to the manifestation of thoughts into reality. As you practice this system and become more confident your thoughts will come into reality much more quickly.

You must keep your energy, intention, and attention directly on your goal. You must focus on what you want, not on what you DON'T want. Stop complaining about things that are not the way you want them to be. Instead, decide how you would like them to be and focus on that. Take a look at your goal every day; give it positive focus and attention. Before you fall asleep and after you wake up, instead of worrying about your problems, imagine your goal successfully attained, and “FEEL” how you would feel if your goal was already accomplished. Go to sleep with this feeling and your subconscious mind will quickly find a way to bring it into your reality.

3. STEP THREE: TAKE ACTION NOW!

The third “key to success” is that you must take action towards your goal and you must take action right now! Making plans to take action is not action. It doesn't matter how tiny the action is or how insignificant you might feel it is; you must take action now with some small step.

You must convince your subconscious mind that you are serious about accomplishing your goal, and there is nothing more convincing than taking action. No matter where you are along your path to your goal, no matter how near or far you might feel to be, there is always an obvious next step you can take. Take that step in this present moment right now!

If your goal is truly out of your hands, you need a new goal. Waiting for other people to change or give you what you want is a sure way to always be unsatisfied. You must pick a goal you are in control of and do whatever it takes to make it come true. That is the only path to power and mastery in life; and the only way to ever feel fulfilled.

4. STEP FOUR: CHOOSE THE SAME THING EVERY DAY

The fourth “key to success” is that you must be consistent with your actions. You must, consistently, choose the same goal every day until your goal is accomplished. You cannot send out constantly changing vague wishes into the universe and expect to create results in the real world. You must decide what you want and then ask for it. If you do not provide the universe with a specific goal which you consistently take action toward; it will never come to you. However, the most important secret of all, DON'T GIVE UP UNTIL YOUR GOAL IS ACCOMPLISHED.

These four “keys to success” are success strategies that have worked by millions of people and will work for you also. Don't wait—just decide what

you want and get started. HOW that goal is going to be accomplished is not important. Clarity comes after commitment and these four "keys to success" are simple to do!
