

## The Impact of Golf Courses in Nature

Golf courses are very attractive places to people who love the beautiful way they are designed and how perfectly they mix the sports side of it and the natural characteristics it has. While the courses are definitely great places to play at however, it is also important to understand how they impact our environment, let's take a look at some of the facts regarding golf courses, society and nature.

When it comes to properties and society, and the courses tend to enhance the value of our properties and they contribute to the community by generating additional jobs and they also provide enormous charitable support.

Golf courses can also be treated as water treatment systems due to the fact that the healthy turfgrass they are made of trap hold pollutants in place which makes them effective disposal sites for waste water, this is something that most people wouldn't actually thinking about, but it's very nice to know that such recreational area can also provide this useful function.

Golf courses are also green areas which enhance the general landscape, provide space for recreational activities and can also provide a good habitat for local nonhazardous wildlife.

These areas often have a positive impact in our environment because they act as giant air-conditioners, they provide massive amounts of oxygen, they clean the air that we breathe from all the pollution that is gathered from vehicles, constructions and such and can also cool down the atmosphere all at the same time.

People who manage golf courses are often concerned about the environmental quality of the community they live in as well as the impact any well managed facility will have in the local ecosystem.

The organizations which are in charge to promote and organize your golf events have poured millions of dollars in analyzing the way that golf courses affect the ecosystem which this data that will help them enforce environmental principles and standards which will keep a healthy community and safe golfers.

As you see golf courses have a positive impact in communities where they are built in they also have a positive impact in the local ecosystem, this is why many cities welcome such projects with open arms when they are proposed, because the best type of business is the one that benefits us all.
