

## Lipsense - Have a Million Dollar Smile

Questions like who want to have a million dollar smile should not be asked because it's obvious that every one would love to have such a smile. People who do not have such a smile have an easy and simple way to get that natural, lovely and awesome smile. It is possible with the use of lip sense lip color. It is available in the liquid form and is very easy to apply. Many of the women feel free and comfortable using it. Its area of expertise lies in being smudge proof, water proof, curative and remains for entire day in any harsh situation and hence this does not demand ladies to frequently care their lips.

Lip Sense has come out with Diamond Collections which are very impressive and have very innovative shades which are very unique that had never been in earlier times. This is specifically made for the autumn season. Sparkle, shimmer and gloss are three forms of cosmetics; which are packed in the same product and you need not polish each of them separately. Lip gloss is very much different from the [lipsense](#) because it is used to apply over a lip stick to make them shine and gently moisturize. For big lips use muted colors such as purples and browns. Women having dark complexion can try any shade of mahogany, brown and wine reds.

By now it must be clear to you that your look is not complete without the use of lip sense. Just give a final touch up to your whole make up with a lip sense. Assessing your lip shades again and again is important because the skin texture of all the people keep changing in different seasons. As and when there is a change in the complexion you need to revise matching lip sense colors.

The ingredients in making a particular product, used by the manufacturers of cosmetics should be known by the people. Some ingredients like silica and mica are commonly used in the cosmetics. Silica is use as a thickening agent and mica is used for sparkle and shine. Mica is not chemically formulated. It is a substance from earth. Maximum of us are non science people and so it is hard to explain chemical formulae. But one suggestion is that you better go through the ingredients of the product before purchasing them whether they are good or bad or whether they suit your lips.
