

Helpful Tips for Selecting Appropriate Bridal Jewelry

Every bride-to-be will face many decisions while planning her wedding. Selecting bridal jewelry is among the many choices that she will make. While selecting bridal jewelry may appear to be a minor detail in most opinions, it can have a major impact on the outcome of a couple's wedding album. Selecting the wrong jewelry for a wedding can cause distortions in the wedding photos or it can clash with the overall theme of the marriage ceremony. Most brides are unaware of the thought that is necessary in selecting appropriate bridal jewelry. Below are a few helpful tips for brides to follow when choosing bridal jewelry.

- A bride should choose her jewelry based on the theme of the wedding. For example, if silver decorations are used as an accent throughout the wedding ceremony and reception, then it is more appropriate for the bride and bridesmaids to wear silver jewelry. There are many options to choose from in the bridal jewelry arena. Themes such as pearls, hearts, silver, and beach themes are a few, among many. If there is a common theme used throughout the wedding, then it should be carried out in the bridal jewelry, as well.
- The bridesmaids jewelry should be a variation of the bride's. According to proper wedding etiquette, it is inappropriate for bridesmaids or any other attendee to wear the same jewelry as the bride. However, selecting bridal jewelry that will complement the bride's jewels is highly encouraged. For example, if the bride has selected a double-heart charm, then it would be most appropriate for the bridesmaids to wear a single-heart charm.
- A bride's necklace and earrings should complement her engagement ring and attire. If the bride's engagement ring is made of white gold, then it is appropriate to select a silver necklace and earrings to match. The bridal jewelry set should complement the bride's gown as well. If the bridal gown has tear drop lace appliques, then a tear drop crystal pendant would be a suitable accent.
- Choose photo-friendly jewelry. Some rhinestone jewelry does not appear well in photographs. Non-crystal rhinestones have been known to appear as black dots in photos. If you are looking for a sparkle affect without breaking your budget, Swarovski Crystal wedding jewelry is an elegant alternative.

Traditionally, the mother of the bride will assist her daughter with getting dressed on her wedding day. Fastening the clasp on the brides necklace is always a momentous occasion between a mother and daughter. It is very important for a bride to select an appropriate bridal jewelry set for her wedding. Choosing unsuitable wedding jewelry can be detrimental to your wedding photos. After all, the wedding album is the key to an everlasting memory.
