

The Horny Boss

If you are working hard at the same job for years without getting a decent raise or promotion, it means that you have not turned on your boss. He is not sexually attracted to you and you will get no where on that job. If you want to better yourself and make more money, take a break and go to the employees rest room and look in the mirror, decide if your appearance is sexy enough to attract a horny new boss, if it is, start looking for a job where you will be sexually desired. Don't leave the old job if you are homely or fat, because horny bosses will only hire a woman with a curvy body combined with a pretty face.

An attractive job applicant with just basic intelligence and willingness to admit that she is sexually liberated will be immediately hired with a fantastically high starting salary. The new employee will immediately be introduced to the superior officers of the company and will be wined and dined. If her performance pleases the staff, raises and promotions will quickly follow. Her perks will be free vacations, with a few of her favorite superiors as escorts. It sounds like a dream come true but it can happen to you if you qualify.

Getting a raise or promotion has nothing to do with your work performance, but has everything to do with the way you turn on your boss. A boss has worked hard to get where he is and he should be rewarded by having a sexy looking employee to make love with. If you are "sexy looking", and kind to your boss you will climb the corporate ladder at unbelievable speed. You will have earned it, lay back and enjoy your job.

The human being has not evolved much further than an animal in heat; men are naturally horny and they go wild when they look at an attractive female. This lust has entered the work place and people in positions of power are dominated by its force. This is good news for attractive and also sexy looking women. They have an unbeatable advantage as an employee, and they don't want to lose it. Seldom do they complain about a horny boss.

Nobody is complaining about the advantages of being an attractive employee except a few homely women who wouldn't mind making love to a horny and also rich boss. There is no known way to stop horny employers from hiring attractive job applicants for the sole purpose of making love to them. This discriminatory hiring practice will continue as long as a boss is horny. http://360.yahoo.com/melvin_polatnick
