Does natural progesterone cream help with hormonal imbalance?

There are numerous "magical" cures on the market these days, each one claiming to be the latest and greatest. If only there was some kind of cream you could rub on your skin and "Presto, chango!" everything would be wonderful.

Of course, there is no such thing. But there is a cream that has been around for a very long time and that has a very good reputation. But it isn't quite as simple as magic.

The human body has the ability to heal itself, if only we could give it the necessary tools. That is primarily how medicines work, especially natural remedies. Also, when the body is in a state of balance, the emotions tend to be on an even keel as well.

Now, if we could give the body the tools it needed to restore and maintain hormonal balance, wouldn't that be a huge relief to families everywhere? It is no secret that many women, in particular, suffer from hormonal imbalance. It isn't anyone's fault; it just is the way it is.

I don't know about you, but I spent many years "walking on eggshells," just waiting for something to break. You see, my wife suffered from a hormonal imbalance, but refused to treat it! In fact, she just plain denied everything. Our family suffered many, many rants, rages and episodes that shouldn't be repeated.

While on a trip, we visited some friends in Washington state who were very excited about what had happened in their family. You see, the mother had been an emotional "wreck" for some time. It was sad, such a lovely woman reduced to hysteria and bouts of depression. I had known her for many years and always remembered her as a lively, happy person.

She had "discovered" something very special that honestly and truly helped her, without any side effects whatsoever. In fact, there were good side effects! What she had benefited from was a natural progesterone cream made from Mexican wild yams. The side effects were the softness of her skin and the disappearance of those dark, age spots.

If you have ever been around somebody who was on an emotional roller-coaster because of a hormonal imbalance, you could appreciate this "discovery." And, if you ever witnessed the amazing change in demeanor, stability and peace that I did, you would understand the purpose of this little article.

Since that time I have learned quite a bit about this amazing cream. Not all of the products on the market are the same, obviously. It isn't necessary to spend a lot of money either. In fact, the cream is far less expensive than a prescription that doesn't really address the main issue, natural hormones. What is your body ever going to do with some kind of synthetic hormone made from a horse anyway?

There is a lot of scientific evidence and explanation concerning natural progesterone cream. You can find out much more by visiting this site:
