

Cosmetic Dentistry, Dental Teeth Whitening

You want people to fall in love with your smile? I think in the 21st century and such advancement in medical field, it is not impossible to have a tempting smile. You need to know about Custom Bright which is going to help you know about cosmetic dentistry technique.

Dentistry is a medical term which can be simplified in the following words: "The branch of medicine dealing with the anatomy and development and diseases of the teeth." Whereas cosmetic dentistry means improving the appearance of a person's teeth, mouth, and smile.

Let us make it simple for our reader, if you look into the past you might have heard about the gold and amalgam fillings. These filling were use to stop teeth decay but such fillings left visible dark spots on the teeth. But now the new available material for teeth filling is porcelain or composite materials that closely match the color of your teeth, thus maintaining the natural color of your teeth. This technique also falls in the cosmetic dentistry.

Technological advancement in dentistry has helped dentists to address various problems relating to your smile, teeth or mouth. New trends in cosmetic dentistry are now being introduced and used by a large number of people in America. The two very latest techniques are smile makeovers and full mouth reconstruction.

Procedures that come under the Cosmetic dentistry nowadays are as under:

- **Tooth Filling** -Dental filling is a traditional process in which either your teeth is filled with gold, amalgam or porcelain material, both coming under the cosmetic dentistry.
- **Bonding** -The repairing of knapped or broken teeth is done by a process called bonding. A dental composite material with a look of enamel is used on the surface of the tooth, where it is then sculpted into shape, contoured, and polished, making the crack or chip invisible.
- **Teeth Whitening** -A cheap procedure, which is highly recommended and used by a large number of people, is Teeth Whitening. Being humans carelessness is in our nature and sometimes we don't care about our intake and its side effects. Smoking and drinking (coffee, wine or tea) leaves stain on our teeth. Then we want to make our teeth white and have a killing smile. Bleaching then enhance the appearance of our smile.
- **Dental Implants** - Dental implants are artificial tooth root replacements that are used as a part of prosthetic dentistry in order to compensate for tooth loss. Often the result is not only an enhanced smile, but also a more youthful appearance, since missing teeth cause the face to collapse, making you look older.
