

Professional Teeth Whitening, Tooth bleaching

Share moments, share smiles

Many people have stained front teeth and look bad when they smile or laugh. The stains may give the impression of bad oral hygiene but the cause may be somewhere else. It is important to understand the cause of the problem and try to find a long term or cosmetic cure. White teeth always look good, enhance confidence levels and one's personality. So let us strive for them-let us check the products of Custom Bright

There are some common causes but your problem may be due to some totally different reason. In that case you are requested to consult a professional teeth whitening dentist at Custom Bright.

Don't get in the way of a smile

- More than two cups of coffee a day can cause your white teeth to stain quickly. These brown stains manifest on the front teeth and are difficult to get rid of.
- Red wine can quickly stain your teeth and the cosmetic cure can be really expensive.
- Smoking is another common cause of brown teeth.
- Gum disease, infections and bad oral hygiene can also cause white teeth to turn yellow.

Custom Bright has the solution for your problems

Smile, you've got it!

- Brush your teeth everyday, every 12 hours.
- Do ensure the bristles are not worn out.
- Change your brush regularly.
- Old worn out brushes cannot brush away plaque forming bacteria and are useless.
- Visit Custom Bright if there is there any problem.
