

Men's Valet ½ From Old Hangers to New Executive Suit Stands

Style is an intrinsic feature of a successful man. Style is the proclamation of individual stature and grandeur – it is a consistent statement of your being. Your style will magnify your sense of existence and your art of living. Everybody survives but few live it with style. And for those who have the flair for style realize that proper accessories are an inevitable part of their lifestyle.

Men's fashion has a strong and stable history of growth and experiment. From the year 1814 since Lord Chesterfield's fashion statement, men's fashion has seen continuous revolution. With the strict etiquette rules of Victorian age, the sense of propriety of the Victorian lords and the atmosphere of Victorian male chauvinism, the advent of majestic and sumptuous fashion accessories had echoed the beginning of a new vision. The stately endeavor of men's lofty fashion practices gave birth to useful accessories like men's valets.

The year 1901 saw the exploration of outing fashions like golf, cycling and tennis outfits. With the sportier image, the pronouncement of stately fashion gradually declined. But, along with the sporty costumes, the emergence of men and boys' shirts was another big event paving the way for the grooming of new valet designs. The end of the first decade of the previous century showed the formation and foundation of the modern fashion in men's attire.

With the growing internationalism and two world wars, the effect of multi-cultural fashion shaped men's formal and informal wear profoundly. This has revolutionized not only the social, economical and political scenario of the world, but has laid the foundation of the modern understanding of men's valet, its necessity, design, and structure. The new era after 1950s, has seen the advent of newly designed top hat, tuxedo, tie, leisure suit, formal jacket, dinner jacket, wedding suits and many more new apparels and accessories. With all these fashion inventions, the design and make of the men's valet was also modified. The men's valet and suit stand received its modern form in the beginning of 1970s.

The fashion world is based on experiment. Along with the changing fashion genres, the experimentation with fashion furniture is also on the vogue. Men's valet comes in different formats and various forms. From simple one wood hanger to complex multi purpose valet chest – a wide range is on offer. [mens valet](#) presents to you an extensive variety of choices with fabulous range of Men's Valet Executive Suit Stand.

Simply put, men's valet is a sophisticated piece of furniture where clothes are hung. Typically, a valet comprises of jacket hanger, rouser hanger, and shoe bars with a drawer or tray where regular use items like wallets, keys, pens, knives, mobile and such things can be placed. Some men's valet comes up with additional drawers where other useful items and documents can be kept. It has hangers not only for hats and over coats, but also has drawers to keep accessories like watches, tiepins, cufflinks, lighters and related accessories favored by men.

However with time, men's valet has no longer remained simply an assembly of clothes hangers, but has become an organizer with several storage capacities for documents and day-to-day useful items. The modern man's attire is not complete only with clothes, but a wide range of accessories as well. The new designer range of valet is aimed to help them organize their life and time more professionally. And with the new electric clothes valet, it is whole new chapter to the magnificent world of men's fashion. The invention of new age furniture is aimed at the comfort of the user. The electric valet is popular because of its ability to keep the clothes warm with the help of an in-built heater. The heater temperature can be controlled by users to keep the clothes warm at a comfortable temperature range.

Traditionally, a men's valet encompasses an upper portion and a lower portion. The upper portion comes in with a front support and a rear support. The front support is designed with various first clothes hangers along with a purse holder or other small document placer. The rear support has the second clothes hangers. It also comes in with a skirt attachment. This attachment has at least two clips.

The lower portion is attached with the supporting stand legs and a shoe rack. In many cases, some parts of the first and second hangers are detachable from the whole structure of the valet. The removable hangers can be assembled with closet clothing pole. The skirt attachment, at many places, can be hung from the second hanger by removing from its former place. It can be placed at the second or the first assembly, as required. The clips at many places are attached with the horizontal support.

The range of [men's valet](#) offered by ValetStand is an ideal choice for this purpose. The range is not only comprised of hangers – it is a complete men's clothing valet suit stand organizer. The large valets are ready to store many clothes and accessories. The in-built accessory and jewelry box along with the exterior tray organizer is a complete set of documents and items holders. Not only are the crease free trouser hanger bars or the contour hanger available, the extending tie and belt bars are also a treat for busy professionals.

The solid wood construction makes it durable by giving it a touch of grandeur and traditionalism. The solid lotus hardwood construction, which is similar to the maple wood, is the ultimate statement for durability and strength. The range comes with different colors of mahogany, cherry, and dark walnut and light walnut.
