

Nokia mobile phone: Delivering a rich experience

Nokia — the largest manufacturer of mobile phone on this planet — continues to lead the field in the mobile industry. Besides having all the latest features to stay connected to the world, the Nokia mobile phones give you an easy way to have great fun. With their exciting features like new 3G services, such as streaming multimedia audio, video content and blogging, now consumers can download the latest business news as well as sports highlights of their favorite teams.

Now Nokia's latest mobile phones which are gaining foothold in the mobile industry are Nokia N series phone. The N series channel is acclaimed for its brilliant host of features which will extend your cell phone usability to the next level. Handsets such as the N90, N93, and N80 set the bar with impressive hi-fi feature sets. With the N76, Nokia's aiming to get into the thin market, one that's been long dominated by the RAZR. Touted as a music smart-phone, the N76 combines the Symbian operating system with stereo speakers and a 2 mega-pixel camera in a device that's actually thinner than the RAZR.

The other model Nokia N92 which offers easy access to live TV programs without having to sit in front of a television set. Using a Nokia N92 device, one can set reminders to watch their favorite TV programs, create personal channel lists and subscribe to TV channel packages. The outstanding new form factor offers a highly ergonomic user-experience. The usability is further enhanced by the large 2.8" anti-glare QVGA screen with 16 million colors and the dedicated media keys that deliver a rich viewing experience.

Furthermore, Nokia 6233 — the latest Nokia model phone to feature the Series 40 Platform 3rd Edition — ensures that 3G services and applications can be accessed easily and intuitively. Supporting the latest messaging, browsing, music and video standards, the Nokia 6233 features a brilliant 320 x 240 QVGA display, with an 'Active Standby Mode' that gives immediate access to the most-used applications. In addition the other model Nokia 3250 music phone is quickly earning a reputation as a must-have summer accessory - storing up to 750 songs (1 GB) of high quality music and sporting a 2 mega-pixel camera in a unique design. This sleek 110-gram model offers a 2 mega-pixel camera, a large QVGA color screen, a digital music player, stereo speakers and a broad range of features and applications which take full advantage of WCDMA services. Powered by the leading smart-phone software S60, the Nokia 3250 offers a dynamic mobile music experience.

[Nokia mobile phones](#) are pushing the boundaries as it is adding more and more features every day. So, experience the magic and extend your sphere of influence by using Nokia's next generation mobile phones.
