

Different Types of Floor Mats

Whether it's your home or your work place, floor mats are used to trap dirt and moisture. This maintains hygiene, prevents slipping, and protects the floor. Over the years a lot of research has gone into the design and development of entrance mats and indoor mats. Today mats are designed keeping various functional aspects in mind. For example, high traffic areas such as retail stores need rough and tough mats.

Always go for durable, highly functional, and great looking mats for best results. Also pay attention to indoor mat backing material that is the base of the mat that keeps the mat in place. With the passage of time new materials have been used to manufacture floor mats. Rubber mats are quite popular these days. Other mat materials include fiber or any synthetic material.

Sky is the limit when it comes to mats variety. This article has classified mats into categories with respect to the place where it is used.

1. Entrance Mats- Entrance mats are used in hotels, restaurants, homes, hospitals, schools, offices and virtually everywhere. They add to the beauty of the place and offers great functionality too. They keep dirt and water out as people step in therefore ensuring cleanliness of the facility. Thus, they form a very integral part of office entry or exit door ways. Many varieties of entrance mats can be bought. Some focus on design while others on functionality. Yet you can buy entrance mats that provide both. Masterpiece Select entrance mat combines beauty and durability. Water Hog Classic mat is resistant to electricity and available in a huge array of colors. The unique Waterhog Grand Premier mat has innovative rubber-reinforced face design.

2. Interior Mats- Interior mats or indoor mats are used indoors, in walkways indoor, near the counters or stands for comfort where people need to stand for long hours. Apart from working as anti fatigue mats, they also protect the floors from dirt and moisture and give that sophisticated look to the interiors. When buying an indoor mat, ensure that it traps and holds water and soil effectively without leaking on to the floor area. Indoor mats are available in a variety of colors to match the interiors of your place. Made of textured and slip-resistant nylon, the Tri-Grip interior mats are ideal for high traffic areas. ColorStar Crunch Mats are perfect to be used as entry-way mat.

3. Workplace Mats- As per OSHA guidelines on worker safety, "An employer shall take every precaution reasonable in the circumstances for the protection of a worker." Thus the use of anti-fatigue workplace mats is very common in all kinds of workplaces. Workplace mats are a perfect combination of anti-fatigue performance and safety features. They are used in manufacturing units, industrial floor, offices and many other organizations ensuring comfort of employees. A large variety of workplace mats are available in the market. Some workplace mats are Happy Feet Mats, Heaven Mats, AirFlex Mats, Wet Area Mats or Scraping Mats. Place order for workplace mats, after determining whether you need a workplace mat for wet, moist, greasy or dry environments.

4. Customized Logo Mats- A mat with an organization's logo certainly helps in strengthening brand identity apart from providing functionality. Logo mats can be customized specifically to suit your business requirements. While customizing a logo mat, you need to specify logo mat material, color, and text as per your need.
