And even though modes of transportation were already becoming an important aspect in society, only a privileged sector had enough funds to acquire one. As a remedy, Hitler sought the assistance of then automotive engineer Ferdinand Porsche to design a quality yet affordable car for the common people of Germany. Thus, the "Volkswagen" was conceptualized, as the ultimate "people's car" model.

Today, Volkswagen has developed renowned and outstanding lines in the forms of the Volkswagen Beetle, VW Golf, VW Jetta, VW Passat, VW Touareg, VW Rabbit, VW Polo, and VW Corrado, among others. Volkswagen has also acquired a fleet of prestigious brands under its wing, namely the Audi, Skoda, and Lamborghini.
