

The Fujitsu P42HTA51ES Flat Screen TV - There Are Better Flat Screen TV's Than This

Most people are now so much into Digital TV that it's very difficult for anyone who has tested Digital TV to do without it. The taste of the pudding is in the eating obviously -- anyone who gets a taste of the powerful channels available on Digital TV can't imagine not having one. There are lots of reasons behind the dominance of Digital TV over Cable TV in people's homes today.

For many people, the most important reason why they prefer Digital TV is the fact that one can also get access to information via Digital TV. With all the channels that exist on Digital TV, you just can't go wrong with the experience. Kids now have their own pick at the children channels they want to watch -- from the diverse array of children channels to watch on Digital TV.

Happy times are here for Digital TV companies, especially since it costs much less to own one. The cost of Cable TV is much more than Digital TV. Most that contemplated this fact are just shocked. Why should it cost less than the competition, yet deliver more than the competition?

Very few subscribers to Digital TV will say they haven't had a wonderful experience. I must confess that the most important reason why I absolutely love Digital TV is the fact that you can watch channels from many varieties. You have a varied options when it comes to Digital TV - from entertainment channels, comedy channels, movie channels, drama channels, etc, Digital TV is the way to go for everyone. The variety that Digital TV offers blows Cable TV out of the water.

Having discussed the impact that Digital TV has had on our lives how does this impact upon the Fujitsu P42HTA51ES Digital TV.

The P42HTA51ES is a 42in Plasma TV and currently these TV's can be found for 2000 pounds sterling or 4000 US dollars. The screen resolution is 1024 X 1024 and with regards to being HD Ready the answer is yes. The Fujitsu has 3 (3 RGB) scarts and the type and number of Multimedia interfaces the P42HTA51ES uses is HDMI and DVI (1 each). The type of Tuner for this TV is Analogue and the Fujitsu is available from limited outlets only.

So given this information, what would be our view of the Fujitsu P42HTA51ES?

First up, we would look at the picture quality and our score here would be 4, next we would look at the sound quality and our view of this would be 4. Another useful aspect to review is the availability and number of relevant connections and our score here would be 10. As far as overall features are concerned we would give it 8 and the final individual verdicts would relate to the ease of use and overall value for money and our scores here would be, 8 and 4 respectively.

Finally our overall opinion would be that this TV might have impressed the guys in the Office if it was a budget or mid priced TV but for the price quoted we expected a whole lot more

With the wide range and variety of makes and models available for you to choose from it is unlikely that you will not find something to suite your taste or satisfy any budgetary constraints that you might have. You could be completely avant-garde and stay in the forefront of fashion and design or you could decide to take perhaps the safer option and go for one of the established makes and models available. No matter what rout you take we hope that after reading this article you should be more informed as to the correct choice with which to take.

With regards to the prices in this article we have tried in all cases to take an average across the industry from a number of well known web sites and so we ask you to bear this in mind and treat these prices as advisory only rather than absolutes.
