

Sony Wii Systems In Stock – Where? – Read Here Quickly!

Almost two months after the big Christmas rush, it is still proving difficult to find the sony wii systems in stock and selling at its recommended retail price. Such is the popularity of the console, even well over a year after its original release, the most hardened shoppers are having difficulty tracking down good deals.

There are now a few retailers that have Nintendo Wii's in stock but tracking these down can prove difficult and time consuming especially if you have to trawl around the shopping malls looking for them.

The stores that often offer good competitive prices for products are finding themselves out of stock most of the time. Until their shelves are restocked there is little chance of finding a Nintendo Wii there and most of the more expensive resellers are looking to cash in on the shortage.

To find Nintendo Wii systems in stock for a reasonable price will take some web savvy and vigilance. There are a number of websites on the internet devoted specifically to tracking the availability of Wii consoles at various high street and online outlets. If you are lucky you may be able to catch a fresh shipment and get your Wii for as little as \$250.

However, you will need to be quick. It is rumored that the last shipment at this price to go for sale on Amazon.com sold out in 10 minutes. The sustained demand for the Nintendo Wii is nothing short of amazing over a year after its release in the United States. Figures show that about 500,000 have been sold every month since its release and that there is no sign of demand slowing.
