

## uVme - Internet based Moms and Skill Games

uVme the very exciting and vibrant skill games online platform is giving everyone the opportunity to play games of skill in a very dynamic and fun way. It is evident that the growth in the playing of skill games online has been exponential in recent months. Well uVme has created a state of the art games network encapsulating the exact sentiment of what a social networking community of games should look like.

The concept of an internet based Mom really has come in to its own as the world wide web throws up many business opportunities of making cash and the big bucks!! With this in mind I conducted an online survey among a group of coffee morning moms frequenting a near by church hall. It was apparent from my findings that most of the women had access to the internet, some had played games while the remainder had heard about online games, gaming or casual gamers but hadn't taken that one step further.

Once the survey had been completed I arranged to give a short presentation to the group introducing two main concepts. Firstly the fantastic fun aspect of the games available on the uVme platform and secondly the way in which a social networking community as theirs could blossom financially.

All the moms were keen to find away of supplementing their incomes which in a lot cases were totally reliant on partners. This wasn't just in the sense of replacing former incomes from previous employment completely but just to give themselves a few extra dollars without too much effort and more importantly not taking up too much time either. Interestingly it was the fun element that was demonstrated so clearly by moms who probably for the first time were able to understand – games – that their children had been playing previously. Games such as Jigsaw Wars, Bubble trouble and Martian Ball all caused a stir.

Over a coffee I spoke with Geraldina a mother of three all under age 10, a lady who was intrigued by the fluid nature of the games and who took to the games instantly. She loved the concept and the way a contestant was found instantly. Discussing this further with Geraldina she questioned me on the Games Promoter role of uVme. In essence anyone can become a games promoter which gives you the opportunity to earn a percentage from every player who comes on to your website. Uniquely all subscribing games promoters are given a fully licensed games platform web site ( One off cost US\$ 200 ). Equally as the business grows you will also have the facility to introduce new games promoters in to your business. As each person converts in to games promoter there is a US\$ 100 Fast cash bonus payable instantly. This of course will be in addition to the payers spend brought to their sites upon which you again earn a percentage.( up to 41% )

Looking at the Math , my presentation centred a small group of 5 moms who each introduced one game promoter per month with a steady growth of players. The earnings shown were US\$ 1750- 2500 per month after 24 month period .I also emphasized that this wasn't a get quick rich scheme but a business for the longer term.

The work from home internet based mom within the uVme concept is so cool and direct that the opportunity is there for everyone.....addictive games are great fun. Moms finding them in this category probably will have the double enjoyment of playing and earning as well. I can't stress enough that just to have a look even to register as a player is free.

In summary, it can be seen from my research that uVme presents a unique opportunity to play games for free , for cash and even earn from games being played. So if it strikes you as being something different or even curious why not have a free look now.
