

Making Our God Given Goals

As Christians, we believe that every single one of us has a purpose in this world. We believe that every one of us has our own God Given Goals, our own Christian personal vision plan. And that we believe that we have our own role in this stage called earth.

This is what the book Bring Your Vision to Life is based upon, on how we can make our God Given Goals and Christian personal vision plan to reality. Bring Your Vision to Life was made by Dr. Ralph McCall that emphasizes what our life was meant to be. It challenges us to see the world not as what we see it, but how god sees it as the way of [Christian personal vision plan](#).

The book challenges us to make a difference, to choose from what is more important to us, a life of self fulfillment, or a life fulfilled with the task that god has given to us, the Christian personal vision plan.

The book is distinguished as another help book or feel good book; Bring Your Vision to Life is much more different. The book is about challenges on who to bring ones vision to life. It challenges us to make the best of our lives, our god given lives. It lets us step out with god and make a positive change in the world. It lets us have a [Christian personal vision plan](#).

The book is simply written, but that is a bit of a deception, because it forces readers to think about their lives in a deeper way. Every page is packed with principles that encourage readers to understand their and follow their God given calling, our Christian personal vision plan.

Bring Your Vision to Life is about hardships and sacrifices, by making us live our lives to the fullest, bring out the best in us, to have our own Christian personal vision plan. So the book is not for the person who wants to live the routines just waiting for life to happen, or the person who goes randomly from event to event. It helps you through the process in making you Christian personal vision plan to reality.
